This two-day course provides students with the ability to recognize ethical dilemmas in the context of their environments, apply a decision model to resolve these dilemmas, render ethical decisions, and defend under scrutiny the resulting decisions that were made in an effort to resolve these dilemmas.

This course is the fourth offering within the Executive Skill Series.

The target audience for all of the Executive Skill Series courses, including this course, are fire and emergency services personnel in positions of authority who have an opportunity to exercise leadership. An eligible student must be minimally assigned to a supervisory level position (for example, a Company Officer).

Line firefighters or firefighter-paramedics are not within the target audience and will not be considered.
